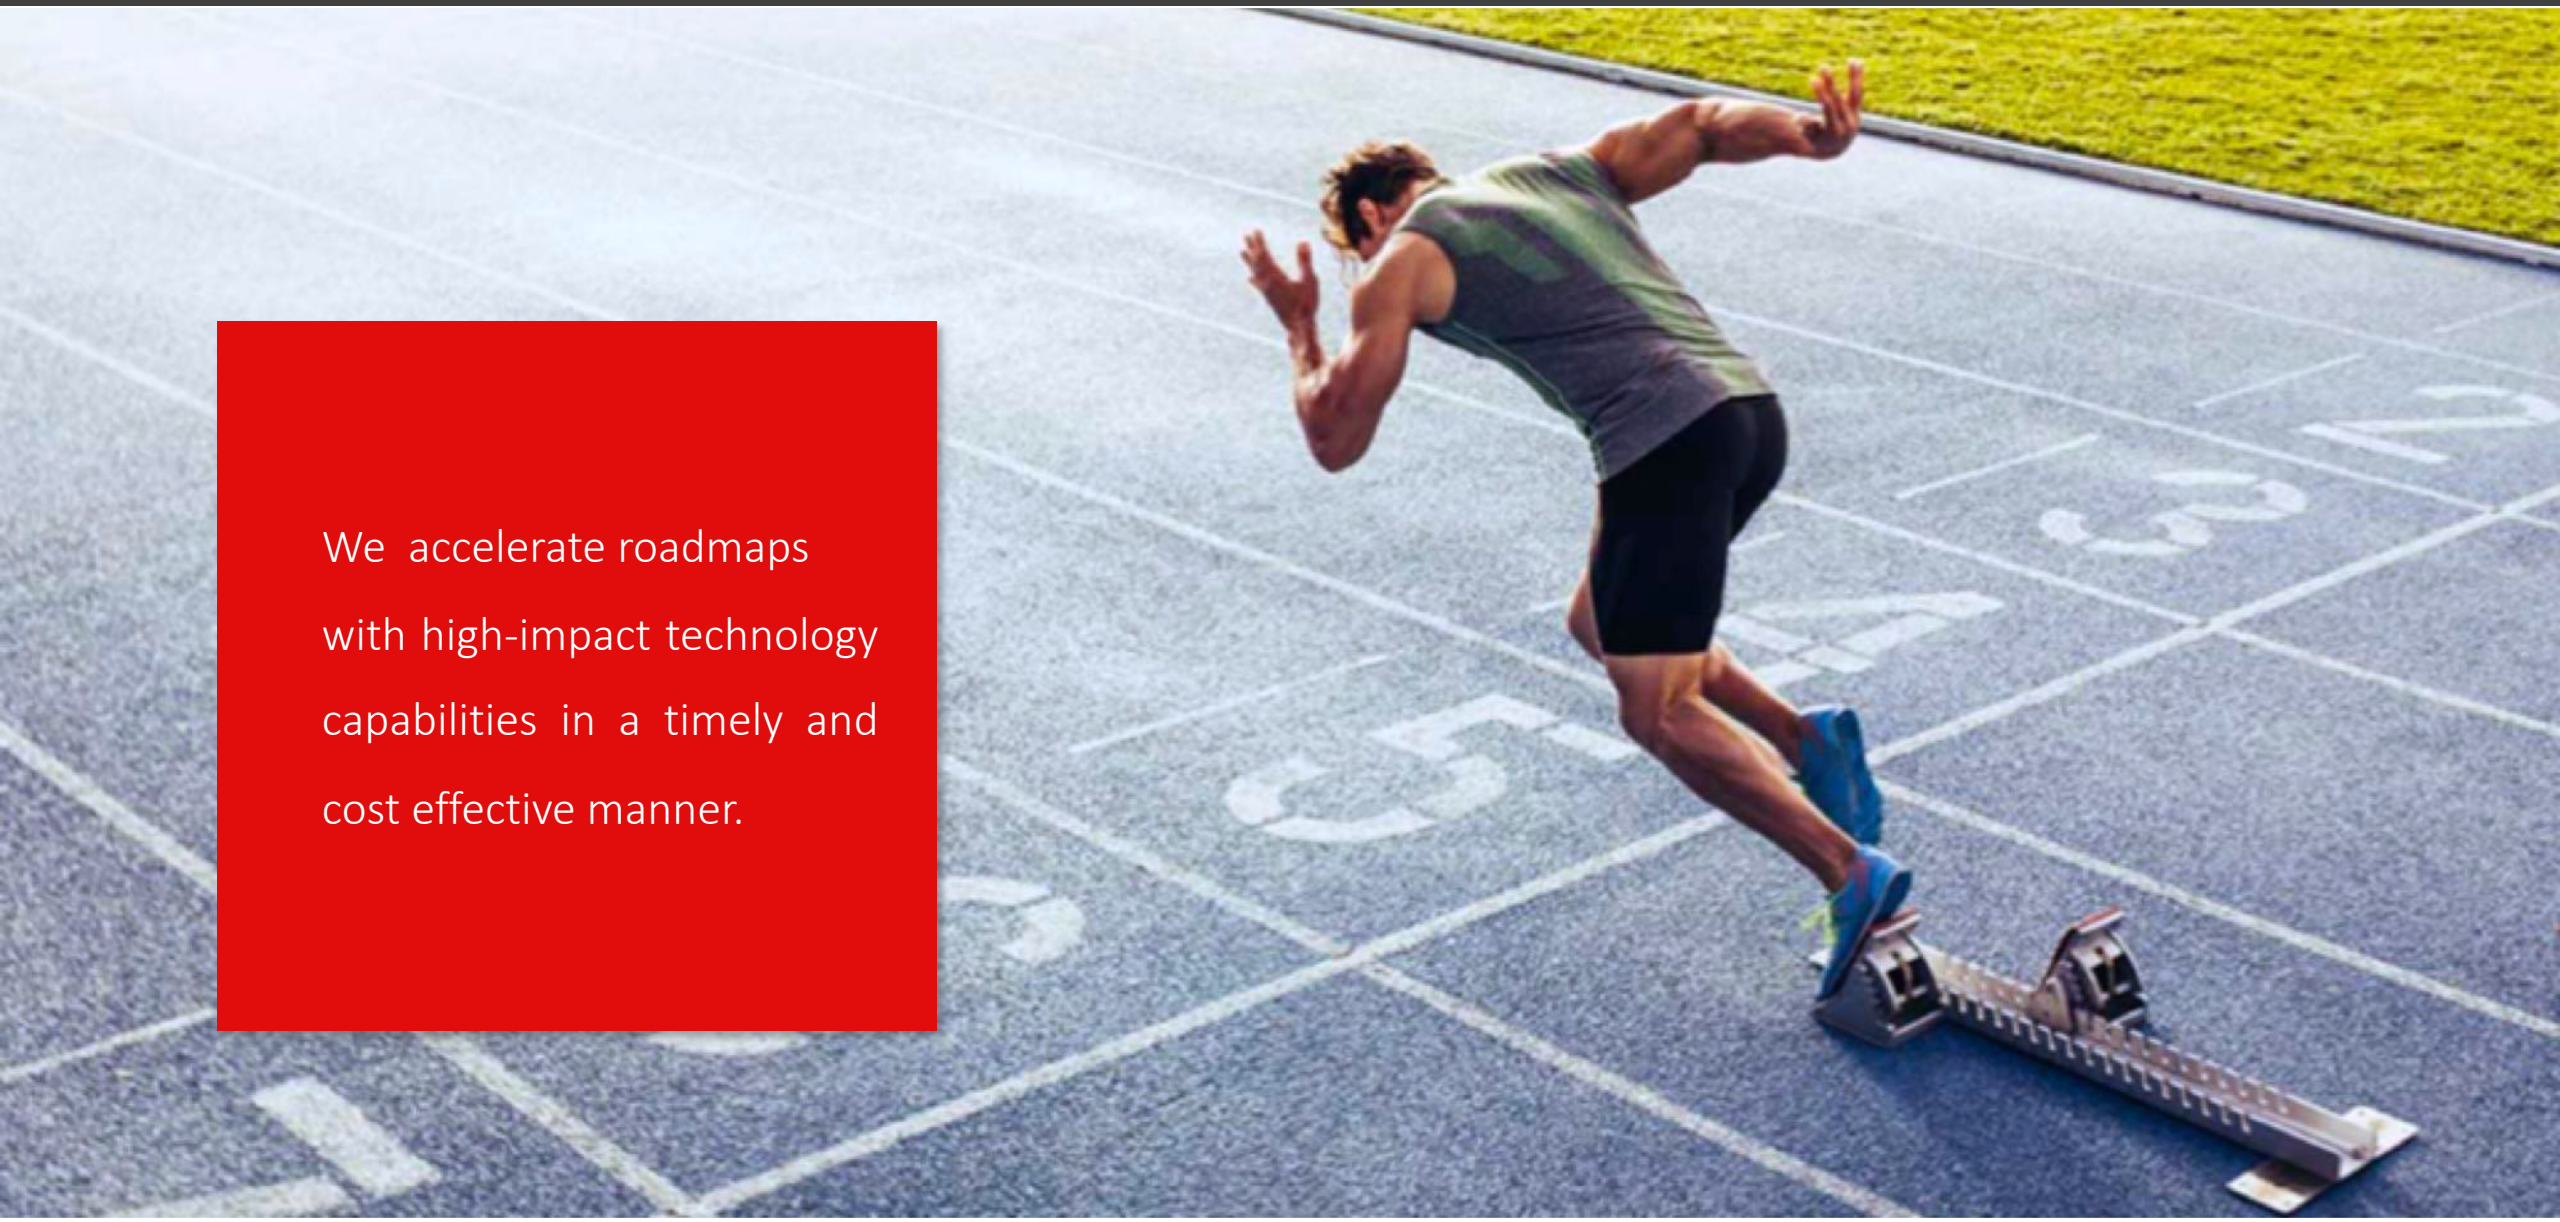
ZYNGL
INNOVATE | EXECUTE | ACCELERATE

The ZYNGL Value



We accelerate roadmaps with high-impact technology capabilities in a timely and cost effective manner.

We are the trusted partner to CTOs

Engage with the best in class engineering teams

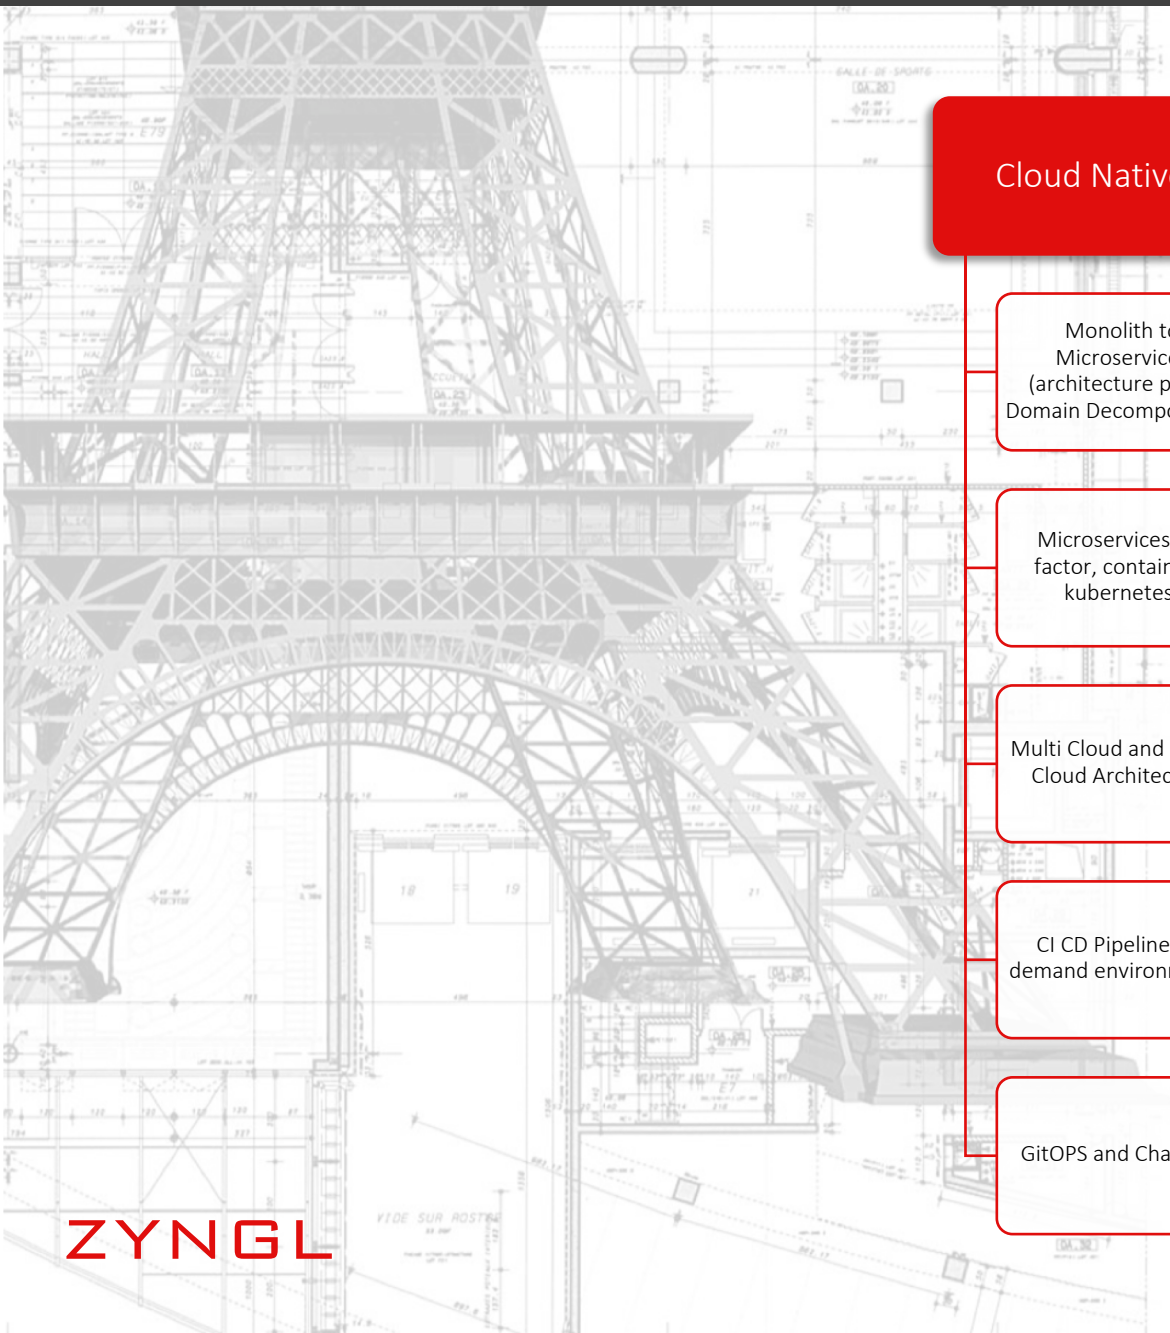
Highly technical, hands-on founders

Work with the industry experts

We enable startups to focus on core while we do the essential day to day grunt work

ZYNGL

Architecture Services



Cloud Native

- Monolith to Microservices (architecture path - Domain Decomposition)
- Microservices (12 factor, containers, kubernetes)
- Multi Cloud and Hybrid Cloud Architecture
- CI CD Pipeline (on demand environments)
- GitOPS and Chat OPS

Highly available Resilient services

- API GW, Service Mesh, resiliency Patterns
- Disaster Recovery – Multi region architecture
- Event based distributed systems
- Security Best Practices

Big Data and AI

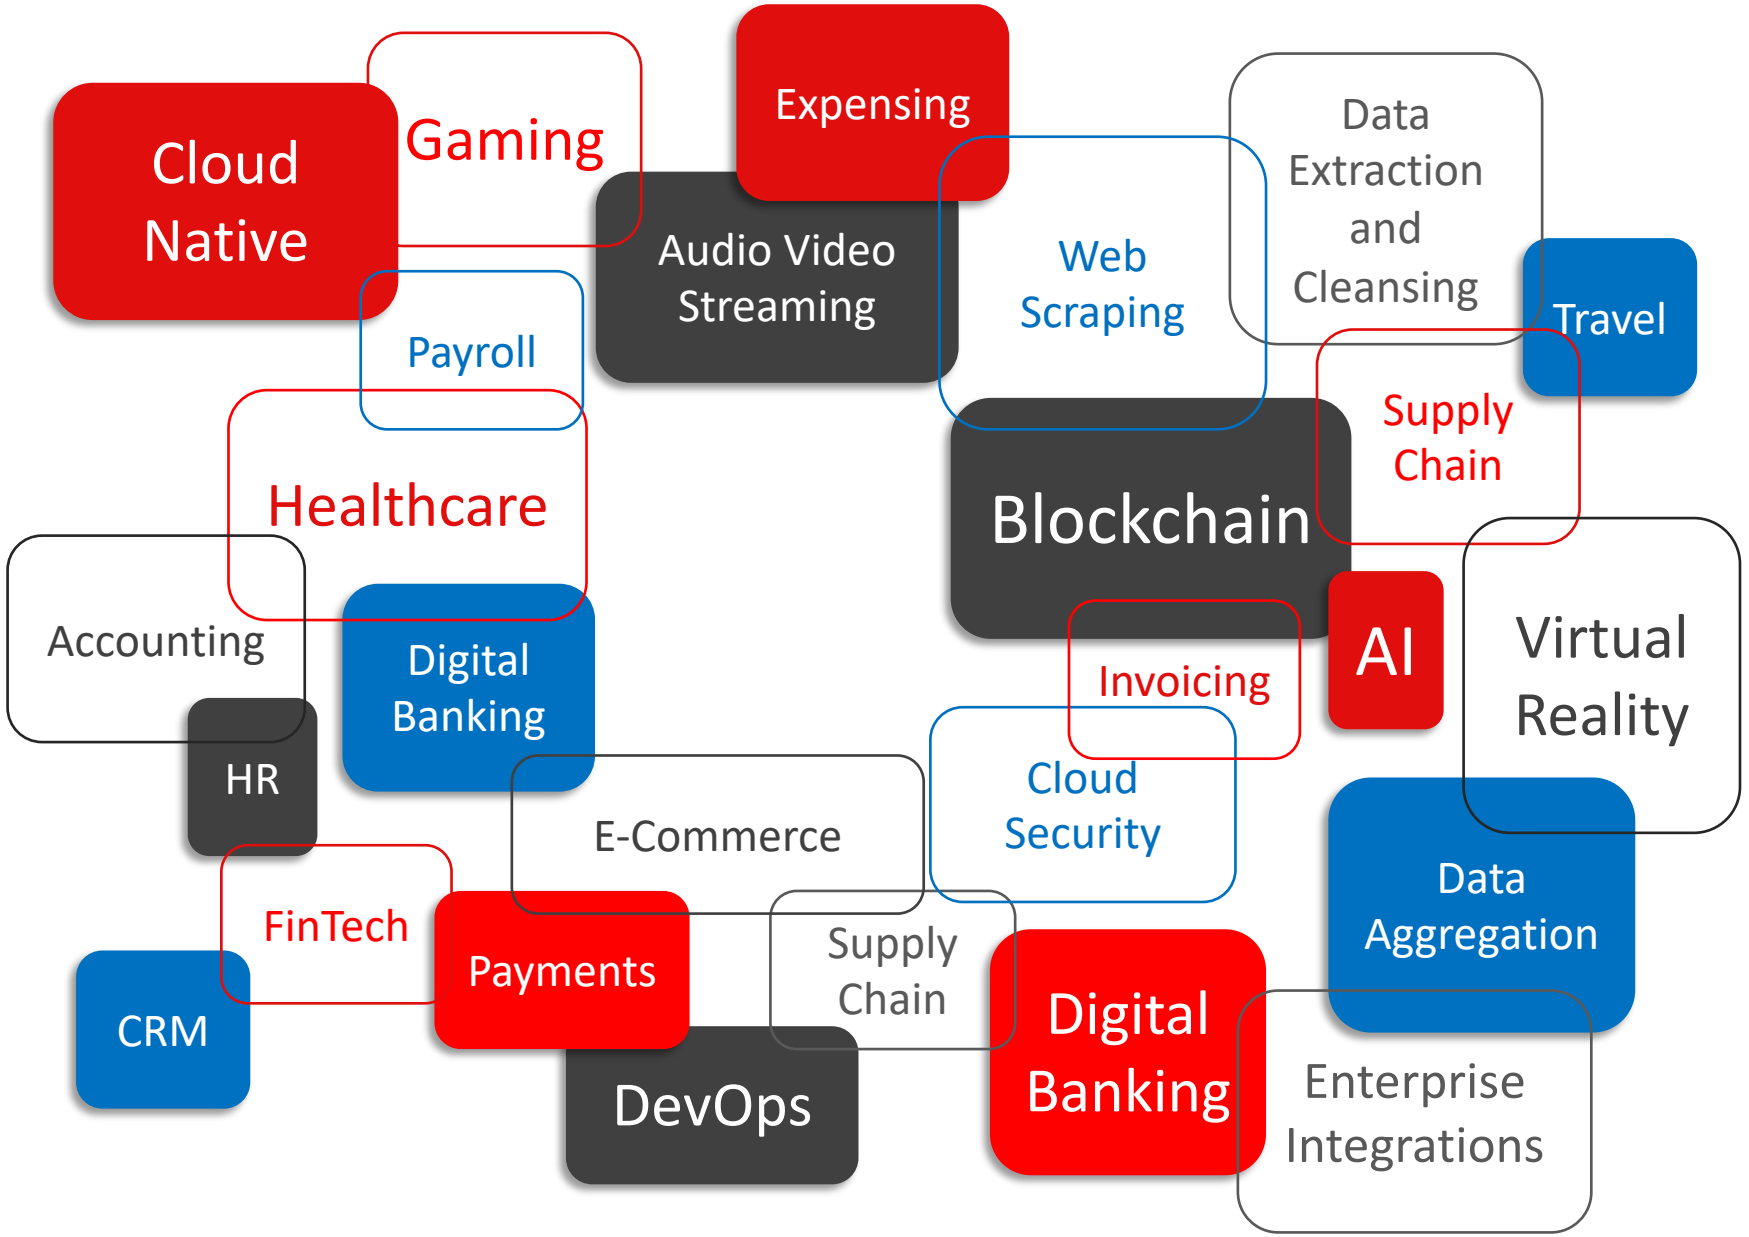
- Data Lakes and Data Pipelines
- Value added real time Data APIs
- Machine Learning and AI
- Human in the Loop AI

Proven Processes

- Domain Decomposition
- API best Practices

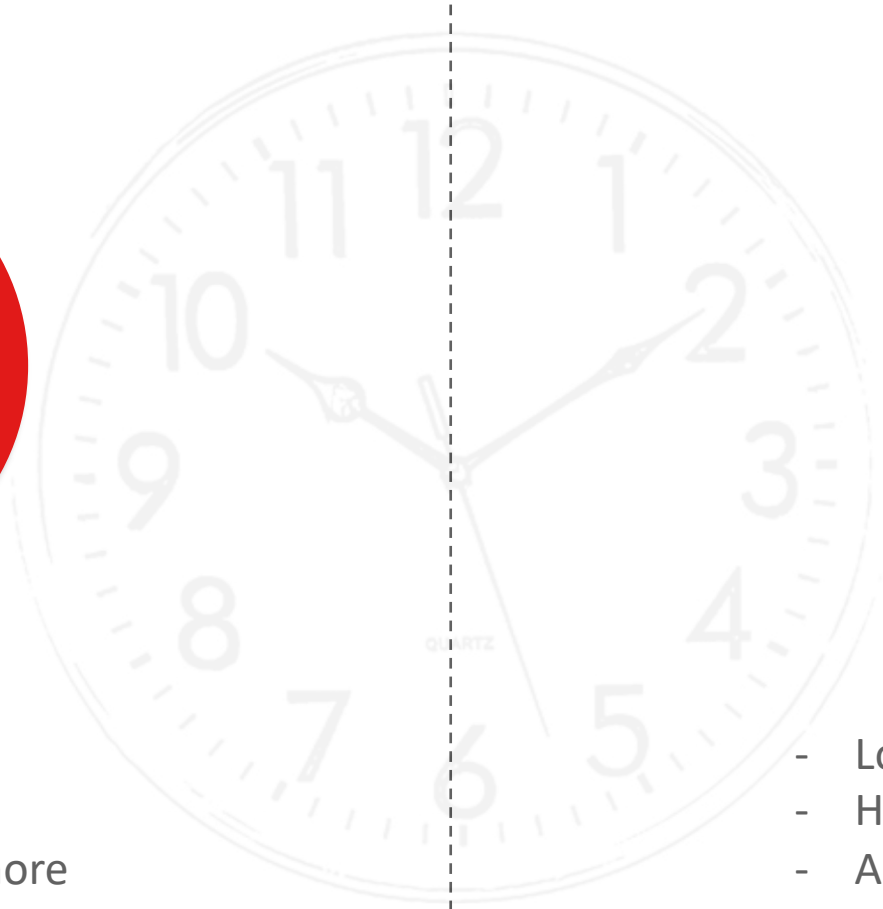
ZYNGL

Domain Expertise



ZYNGL

Engineering Services



Onshore Engineering

- Experts in each area
- Highly technical
- Bridge the onshore and offshore development efforts

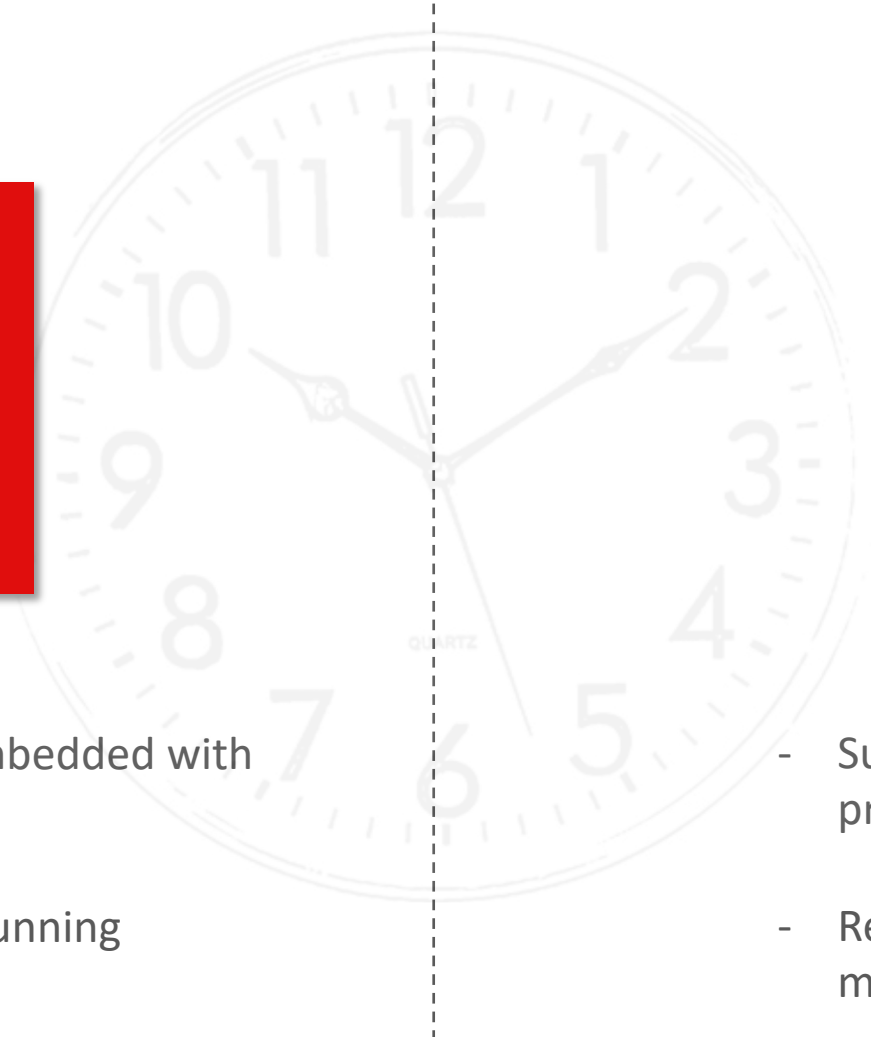
Offshore Engineering

- Lower cost
- Highly technical work force
- Augmented with onshore development teams

Round the clock productivity

ZYNGL

Engagement Model



Dedicated Teams

Option A. Offshore engineers embedded with onsite teams sprints

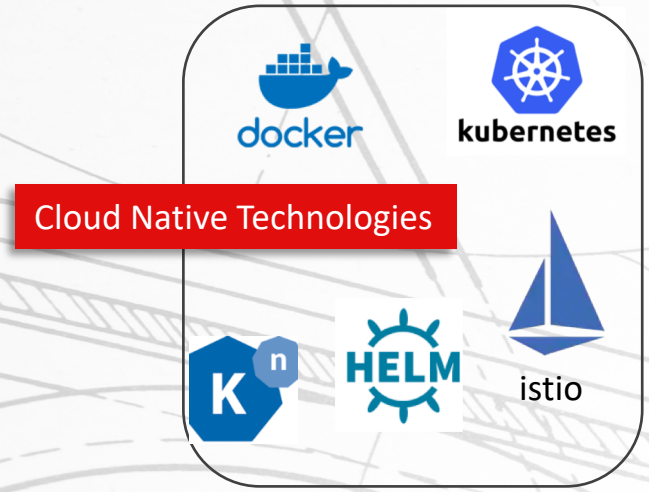
Option B. Dedicated engineers running independent SCRUMs

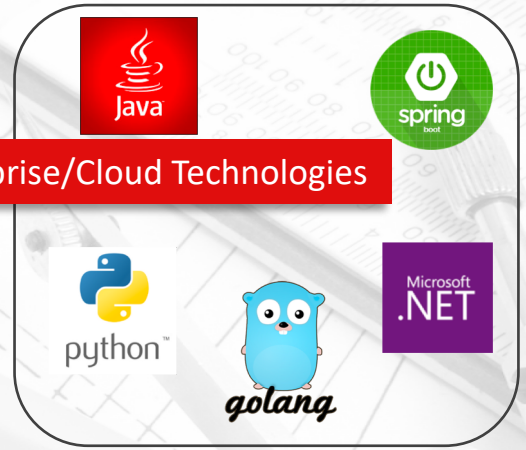
Fixed Price

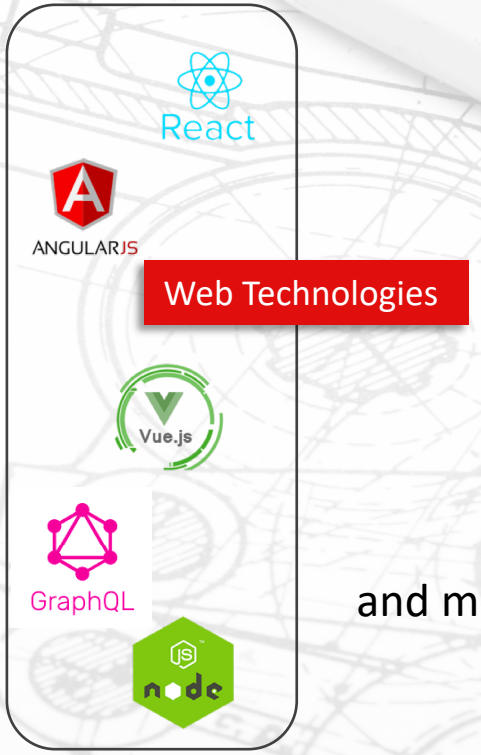
- Suited for clearly scoped short term projects, defined in phases
- Requires product and project management

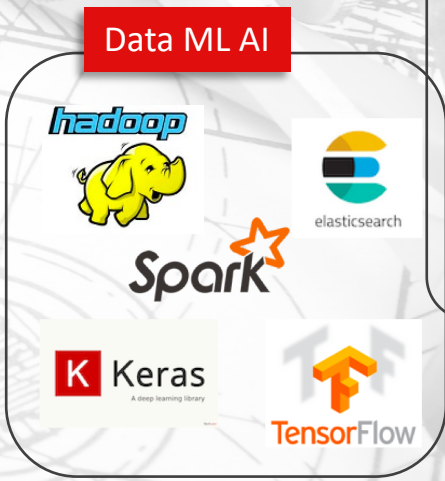
ZYNGL

Engineering Excellence









and more ..
